## How to Read the Vermilion Navigator Report

1. **Pages 1-2 Best/Worst Groups.** The strongest groups (U2 or U3, AR or AF, RSR=1-5) and weakest groups (D2 or D3, BR or BF, RSR=26-30) are identified. Historically the best returns come from portfolio concentration in the strongest groups.
2. **Pages 3-4 list popular Market Indexes plus our 12 economic sectors with our technical indicators:**
  - a. **The Relative Strength Ranking System (RSR)** is read right to left back across the page: RSR is a number from 1-30 with 1 being the strongest and 30 being the weakest. Numbers 1-10 are outperformers; whereas 21-30 are underperformers. Digits 11-20 denote neutral performers. The actual number is less important than the *trend* in numbers.
  - b. **Triple Cycle:** a triple crossover indicator using 4- 13- and 26-week moving averages and their position relative to each other, which classifies sectors/groups/ stocks in various maturities of uptrends (U1, U2 , U3) and downtrends (D1, D2, D3). Historically the best performance is found in the more mature uptrends (U2 and U3), while the worst performance hails from the more mature downtrend categories (D2 and D3).
  - c. **Dual Crossover Indicators with the 50-day MA and 200-day MAs.** Historically the best performance is found in the AF or AR categories. There are 4 possible scenarios:
    - i. **AF:** Price is *Above* a *Falling* 50-day or 200-day moving average
    - ii. **AR:** Price is *Above* a *Rising* 50-day or 200-day moving average
    - iii. **BR:** Price is *Below* a *Rising* 50-day or 200-day moving average
    - iv. **BF:** Price is *Below* a *Falling* 50-day or 200-day moving average.
  - d. **MACD: Moving Average Convergence/Divergence.** This is a popular technical tool and is both a market-timing tool and an oscillator. The indicator is based on 2 exponential moving averages: a) the difference between an 8- and 15-week exponential moving average and then an 11-week moving average of that line. When the two moving averages cross a buy or sell signal is generated, which is indicated by a “+” or “-”.
3. **Pages 5-14** list our 12 economic sectors and component industry groups with technical indicators as listed above.
4. **Pages 15-24** list our industry groups sorted best to worst via the RSR ranking (1-30) and trend.
5. **Pages 25-150 (page numbers vary per market conditions):** This complete **Navigator and RSR section** lists technical indicators and relevant market statistics for all **Sectors, Groups, and their respective stocks. Commodities** are classified into broad categories and included at the end of this section
7. **Indicator Summary** (the next-to-last section) contains single-page overviews for each of three indicators: new highs/lows, triple cycles, and historical dual crossovers, all of which are helpful in assessing the health/breadth of the market.
8. **Sector Technical Summary** is the final section, presenting 5 indicators for Groups and Stocks within each Sector (Triple Cycles, Dual Crossovers (50/200-day MA), MACD, and Relative Strength Ranking (RSR)).
