

Charts are culled from yesterday's biggest percentage gainers and losers and filtered for technical significance: breakouts, sector themes, relative strength leadership changes, bottom-up/top-down ideas.

Key Points:

- Markets remain very volatile, and the U.S. dollar is breaking down. Emerging markets continue to reflect strong RS and precious metals remain leadership. (ex. AU, PPTA, USAU, and NEM)
- High yield spreads have pulled back to the 414 level from their recent high of 452. This remains somewhat high vs the spread narrows. As of now we view the recent market lows near the 4835 level as a potential low, that could still be tested and fail. It is estimated that foreign capital in the U.S. markets are near the \$17 trillion level and may be repatriated as the U.S. dollar declines.
