

Charts are culled from yesterday's biggest percentage gainers and losers and filtered for technical significance: breakouts, sector themes, relative strength leadership changes, bottom-up/top-down ideas.

Key Points:

- Defensive related names and deeply oversold names continue to pop up in our screens as having bullish bases and remain constructive overall (ex. KLG, UVV, ABT, LFCR, DG, DLTR, VLGEA, WMK)
- One of the big questions is whether the S&P 500 and many equities are forming potential bear flag patterns. In our opinion the Jury is still debating, however we are seeing many bear flags coming to fruition on individual charts.
