

Charts are culled from yesterday's biggest percentage gainers and losers and filtered for technical significance: breakouts, sector themes, relative strength leadership changes, bottom-up/top-down ideas.

Key Points:

- USD continues to breakdown. This is a great concern to foreign investors and resembles the major uptrend violation in April of 2002, that was just after 2-years after the dot-com blowoff top. We believe a major repatriation trade is taking place as nationalism in the U.S. leads to nationalism abroad.
- We continue to stress risk-off and in a defensive posture. Just about all foreign markets continue to out-perform the U.S. since the RS lows of late December of 2024.
